

Examine each of the following pairs of triangles and their markings showing congruence of corresponding angles and sides. In each case, decide whether the information given by the markings ensures that the triangles are congruent. If the triangles are congruent, write a congruence relation showing the correspondence between vertices. Cite an appropriate congruence theorem to support your conclusion.

Given:  $\angle A \cong \angle C$ ,  $\overline{BX} \cong \overline{DX}$

Prove:  $\overline{AX} \cong \overline{CX}$

Statement	Reason
1) $\angle A \cong \angle C$ $\overline{BX} \cong \overline{DX}$	1) Given
