Convert each equation from slope-intercept form to standard form.

1) $y = -\dfrac{2}{5}x + 4$

2) $y = 5x + 1$

3) $y = 2x - 3$

4) $y = -2x + 1$

5) $y = -.3x + .7$

6) $y = -x - 3$

7) $y = -3x + 2$

8) $y = \dfrac{4}{5}x - 5$
