

Solve each of the equations for y.

For the even questions, do the following: 1) Graph on a piece of graph paper

2) Give Domain, Range and interval of increase or decrease

1.) $-2(x + 3y) = 18$	2.) $5x + 10 = 10y$	3.) $5y + 8 = 2y - 3x + 5$
4.) $3y = 15x - 12$	5.) $x + 5y - 10 = 2x$	6.) $8x - 4y = -4$
7.) $9x + 3y = 3$	8.) $5(x + y) = 20 + 3x$	9.) $3y - 21 = 12x$
10.) $2x + 3y = 3$	11.) $x - 2y = 4$	12.) $-2x - y = -3$
